PRESS RELEASE

Eagle Flexible Packaging Achieves SQF Certification

Batavia, IL February, 2018: Eagle Flexible Packaging, a specialized sustainable printing and converting manufacturer, is pleased to announce today that it has achieved Safe Quality Food (SQF) Certification.

SQF is the top recognized Global Safety Initiative (GFSI) standard in the country. This certification provides documented proof that Eagle Flexible Packaging has implemented measurable high quality food and safety control systems. These systems are based on government and industry food safety requirements. It also assures our customers that our products are of the highest quality and safe for packaging their food products.

“I am very proud of our Team’s accomplishment”, said Ed Walenga, CEO of Eagle Flexible Packaging. “Our SQF certification was a significant goal for 2017 and it fully demonstrates our commitment to food safety and quality standards. We look forward to challenging ourselves and improving upon our processes as we begin implementing the new standards mandated by SQF Code Edition 8.0 effective 2018.”

About Eagle Flexible Packaging: Eagle Flexible Packaging is a printer and converter of flexible packaging for a variety of products, including retail food, pet food, health and beauty, nutritional, chemicals, medical devices and other specialty applications. Eagle’s products include: high quality printed roll fed film with Inno-Lok® and Pour & Lok™ technology for form, fill, and seal machines, preformed pouches, spouted pouches, shaped pouches and NVIRO® Flexible Packaging (sustainable packaging solution).
